## INTRODUCTION

I am a passionate Web Developer aiming to become a Fullstack Developer with strong foundations in HTML, CSS, JavaScript, and ReactJS. I am currently enhancing my skills in Node.js and Express to build complete web applications from frontend to backend.

My short-term goal (within 1 year) is to become a Fresher Fullstack Developer with a target salary of around 12 million VND/month. In the next 3 years, I aspire to grow into a Tech Lead, leading development teams and contributing to building scalable, high-quality web solutions.

## EXPERIENCES

**Front-end Developer ( INTERN )** 4/2024 - 7/2023

**ACE GAME COMPANY**

- Designing websites for Game's exciting Web events, interacting daily with graphic designers
- Developing and maintaining the front-end functionality of the websites (HTML, CSS, JAVASCRIPT, BOOTSTRAP).
- Working in a team of 3, also participating in the Responsive part of the Website

**Web Developer ( FRESHER )** 8/2024 - 3/2025

**ACE GAME COMPANY**

- Holding the position of Front-end Developer, while expanding to ReactJS.
- Develop some interface features for the company's event website using ReactJS.
- Learn NodeJS, MongoDB in building basic API and managing user data.
- Participate in improving performance and optimizing user experience (UX/UI).

## SKILLS

### FRONT-END

ReactJS, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap

### State/API

Context API, Axios, RESTful API Integration

### BACK-END

Node.js, Express, MongoDB (improving)

### Others

Git, GitHub, Postman, JWT, Lottie React, React Toastify

## LANGUAGES

### ENGLISH (*lets 5.5 overall*)

Able to read technical documents and communicate in basic workplace settings

### CHINESE (HSK 3)

Can read basic documentation and communicate in daily work

## EDUCATION

### TON DUC THANG UNIVERSITY

08/2020 - 03/2025

### COMPUTER SCIENCE

GPA 7.0

**ACE GAME COMPANY**

- Game development planning
- Coordination between departments: programming, design, art, QA, marketing
- Monitor production progress, ensure project completion on time
- Test errors, report to Dev

## PROJECT

**E-COMMERCE WEB - Self project**      8/2025 - 10/2025

**Project Description:** A comprehensive Front-end e-commerce platform built using **React JS** and styled with **Tailwind CSS**, ensuring a **fully responsive** user interface.

**Technologies Used:** HTML/CSS/TAILWIND/JAVASCRIPT (ES6)/REACTJS/Context API/GIT

**Key Responsibilities:**

- User Authentication: **Integrate Clerk** to handle registration/login (Google, GitHub, Email), and protect important routes (Protected Routes) such as the Cart page.
- Filtering & Pagination.
- Cart Logic: Build complex cart logic, including auto-incrementing quantity when adding duplicate products, sorting by product size, and persisting cart data via Local Storage.
- API Integration: Use **Axios** to fetch product data and integrate third party API to automatically detect location (Detect Location) and fetch detailed address information.

**Achievements**

- UX Optimization: Perfect responsive design, improved navigation with window.scrollTo(0, 0) to ensure smooth experience.
- Handling loading states & errors: Show Loading and Not Found animations using **Lottie React** when there are no filter results.
- User Feedback: **React Toastify** integration displays success message when updating or changing cart.

**Github** : DucTech

**WEB EVENT**      8/2024 - 1/2025

**Description:** Website for players who want to top up and buy items in the Game's web event

**Link:** <https://huyenthoailangla.vn/flash-sale-t10>

**Technology:** HTML5 / CSS3, JAVASCRIPT ( ES6 ), ReactJS

**Position:** Front-end Developer

**Detail:**

- Design visual layout of the website.
- Come up with ideas and items to attract players to top up.
- Optimize web content for optimal speed and performance.
- Advise on system and website functionality limitations.
- Create eye-catching and useful digital designs on various platforms.
